

I am a fast learner and curious Jr. Front-End Web Developer specializing in React, JavaScript, TypeScript, and user interfaces.

Projects

Windows 98 UI Library:

June 2023

- Developed a library of fully functional components, styled to replicate the interface of Windows 98.
- Utilized React with TypeScript to identify and rectify errors, ensuring optimal performance.
- Applied CSS to style the components and the [documentation website](#).
- Uploaded the library to [npm](#), garnering a consistent weekly download count of 150.
- See the source on [GitHub](#).

Spotify App:

May 2022

- Developed a Spotify app to search and play music using data from the Spotify API.
- Used React with TypeScript to make the code more consistent.
- Built tests to improve the reliability of the app.
- Designed and rolled out the styles using the Material UI library.
- See the source on [GitHub](#).

Education and Certifications

- **FullStack Web Developer** - Rolling Code School, Argentina. Oct 2022–Aug 2023
 - Acted as the Scrum Master for projects, facilitating efficient collaboration.
 - Helped and upskilled my team members utilizing my prior Front-End knowledge.
- **Front-End Web Developer** - Self-Taught. Feb–July 2022
 - Completed several projects to strengthen skills.
- **Production of goods and services** - Nuestra Señora de la Merced, Argentina. 2012–2017
