I am a front-end web developer especially interested in building great websites experiences, shipping reliable applications and learning more about coding.

Work Experience

Front-End Web Developer **DigiChanges** **Jul 2023–Present**

- Developed websites from scratch using frameworks like React and Next, adeptly translating designs into responsive layouts, integrating features, and connecting APIs, followed by comprehensive maintenance and support.
- Increased weekly downloads of the company library from 14 to 200 by introducing new features and enhancements.
- Provided continual enhancement of UX/UI through proactive idea generation, contributing to the realization of efficient and intuitive interfaces.
- Conducted code refactoring to optimize website performance, increasing speed and efficiency while rectifying coding inefficiencies and bad practices.

Technologies and Languages

- Technologies: React, Next, Solid, Tailwind, Bootstrap, Jest, HTML5, CSS3.
- Languages: Javascript, TypeScript.
- Other: API integration, unit testing, responsive designs, performance optimization.

Projects

Solid Wizard / Stepper: **Sep 2023**

- Pioneered the development of the first wizard/stepper component for the official SolidJS ecosystem.
- Simplified workflow with internal context-based logic for seamless state management.
- Integrated all essential components including progress bar, navigation buttons, and content display.
- Provided predefined styles while enabling full customization with styles and text, ensuring flexibility for developers.
- See the source on GitHub.

Windows 98 UI Library: **June 2023**

- Developed a library of fully functional components, styled to replicate the interface of Windows 98.
- Utilized React with TypeScript to identify and rectify errors, ensuring optimal performance.
- Applied CSS to style the components and the documentation website.
- Uploaded the library to npm, garnering a weekly download count of 150.
- See the source on GitHub.

Education and Certifications

- **Fullstack Web Developer,** RollingCode School, Argentina. **Oct 2022 – June 2022**
- **Front-End Web Developer,** Self-Taught. **Feb 2022 – Oct 2022**
- **Production of goods and services,** Nuestra Señora de la Merced, Argentina. **2012 – 2017**
